

# Subtracting decimals

Write an estimate for each subtraction in the loops, and then complete the subtractions.

1.

$$\begin{array}{r} 8.76 \\ - 3.52 \\ \hline \\ \hline \end{array}$$

2.

$$\begin{array}{r} 9.42 \\ - 5.31 \\ \hline \\ \hline \end{array}$$

3.

$$\begin{array}{r} 7.91 \\ - 2.34 \\ \hline \\ \hline \end{array}$$

4.

$$\begin{array}{r} 6.83 \\ - 1.57 \\ \hline \\ \hline \end{array}$$

5.

$$\begin{array}{r} 6.91 \\ - 1.34 \\ \hline \\ \hline \end{array}$$

6.

$$\begin{array}{r} 4.28 \\ - 2.51 \\ \hline \\ \hline \end{array}$$

7.

$$\begin{array}{r} 6.37 \\ - 4.81 \\ \hline \\ \hline \end{array}$$

8.

$$\begin{array}{r} 8.21 \\ - 3.91 \\ \hline \\ \hline \end{array}$$

9.

$$\begin{array}{r} 6.14 \\ - 1.35 \\ \hline \\ \hline \end{array}$$

10.

$$\begin{array}{r} 5.23 \\ - 2.98 \\ \hline \\ \hline \end{array}$$

11.

$$\begin{array}{r} 4.13 \\ - 2.27 \\ \hline \\ \hline \end{array}$$

12.

$$\begin{array}{r} 3.02 \\ - 1.85 \\ \hline \\ \hline \end{array}$$

13. Make up six subtractions like these. Try to make three of them easy and the rest hard. Give them to a friend to do.

I can do subtractions involving numbers with two decimal places
